

DATA SHEET

Toby Aquamax Domestic Satin

PRODUCT CODE 70172425

Data Sheet No. AUDW1201

APPROVALS

Features

Polyurethane
Waterbased
Roller Applied
Satin Finish

Benefits

Hard Wearing
Low Odour, Fast Clean Up
More Productive
More Natural Look

Uses

Interior timber floors

Performance Guide

Weather Interior Only**Heat** up to 60 C**Solvent** Good for weak solutions**Acid** Good for weak solutions**Salt** Good**Water** Good for splashes and spillages. Not for ponding or immersion**Abrasion** Good**Alkali** Good for weak solutions

Typical Properties and Application Data

Gloss Level 55-60 at 65 Degrees**Spread Rate** 9.0 sqm/L**Components** 1**Toxicity** non-toxic**V.O.C Level** < 95g/L**Wet film per coat** Recommended 111 µm**Dry film per coat** Recommended 33 µm**Recoat** 4 Hrs**Application Method****Gloss Level Ind****Volume Solids** 29.34**Colour** Milkish White Liquid, drying to a clear finish**Number of Coats** 2-3**Sanding Properties** Good**Touch Dry** 2 hrs

Application Guide

Surface Preparation

All surfaces must be clean, dry and free of wax, grease, dust and other contaminants. The presence of such contaminants contributes to conditions such as 'rejection' or 'delamination'.

Sand the surface with coarse sandpaper initially. All nail-holes and cracks should be filled with putty, then fine sand the floor, finishing with 100grit sand paper, then as with other water-based products, it is advisable to close the grain with a 150-mesh screenback.

Vacuum thoroughly with a commercial grade vacuum cleaner. Use a filter with a minimum screening capacity for capturing dust particles of 1 micron.

It is prudent to measure the moisture level of a floor prior to coating to ensure the timber has stabilised.

Notes

RECOATING - As is the case for new floors, the surface must be free of dust, wax, grease and other contaminants. If in doubt check adhesion on a test patch. Wash the floor with Toby Polyclean as per manufacturer's instructions. Sand with a 100-grit screen. Vacuum thoroughly and tack clean with damp towels. Apply one coat of Toby Aquamax Domestic Timber Floor Finish as per above procedure.

SLIP RESISTANT FINISH

A slip resistant finish can be achieved by applying the following system:

- 1 coat Toby Aquamax Roller Seal
- 1 coat Toby Aquamax Domestic Satin, with 5% Intergrain UltraGrip added
- 1 coat Toby Aquamax Domestic Satin

NOTE: UltraGrip will cause a reduction in sheen level of the coating.

Do not sand between coats once the UltraGrip containing coating has been applied.

Decant Aquamax Domestic into another clean container before adding the UltraGrip. While stirring, add UltraGrip slowly to avoid generating dust. Stir in UltraGrip thoroughly with a flat blade stirrer or drill mixer. Stir regularly during use.

Health and Safety

MSDS Number 20172
